## Doulton.

# Sterasyl Ceramic Filter Cartridges

Doultons has been a leading name in drinking water filtration for over 150 years.

Doulton® ceramic
elements are now
available in a range of
standard cartridge
formats which bring the
quality associated with
the Doulton® name to the
general filtration market.

## Sterasyl<sub>®</sub>

#### Features

- Fits Industry standard 10" and 20" filter housings.
- Filtration efficiency of >99.99% at 0.9 micron
- Filtration efficiency of
   99.9% at 0.5 to 0.8 micron
- Highly efficient bacteriological filtration
- Tested with live Cryptosporidium to a removal efficiency >99.999%
- Ideal for R O guard and post filtration
- · Complimentary to UV systems

#### Sterasyl® Ceramic

Doulton Sterasyl is a highly efficient ceramic micro filter which provides genuine sub micron filtration of drinking water.

Sterasyl is manufactured with the highly consistent and controlled pore structure necessary to remove a wide range of water borne contaminants over the life of the cartridge.

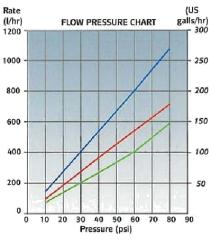

In addition to fine particulate matter, bacteria, cysts and turbidity are removed to a high level of efficiency. The incorporation of silver locked within the ceramic structure inhibits the growth of bacteria and gives each cartridge enhanced bacteriostatic and self sterilising properties.
